$$r_{\text{proton transport}} \approx 1500 \frac{\text{protons / sec}}{\text{electron transport chain}} \quad \text{BNID: 114704, BNID: 114687}$$

$$N_{\text{electron transport chains}} \approx \frac{5 \times 10^6 \text{ protons}}{1 \text{ sec} \times \text{cell}} \times \frac{1 \text{ sec} \times \text{electron transport chain}}{1500 \text{ protons}} \approx 3000 \text{ electron transport chains / cell}$$
