

DNA SYNTHESIS

(A)

dNTP synthesis

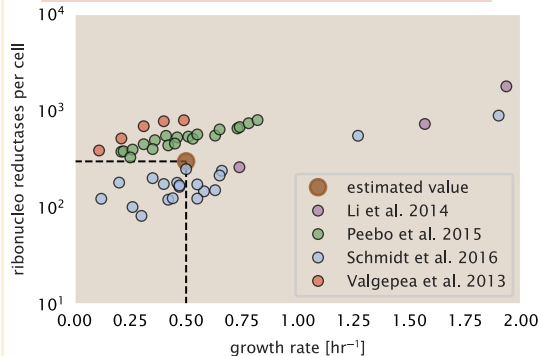

$$r_{\text{ribonucleo-reductase}} \approx \frac{10 \text{ dNTP / sec}}{\text{ribonucleo reductase}}$$

Ge et al. 2003

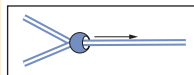

$$L_{\text{genome}} \approx 5 \times 10^6 \text{ base pairs} \quad \text{BNID:100269} \quad N_{\text{dNTPs}} \approx 2L_{\text{genome}} \approx 10^7 \text{ dNTPs}$$

$$N_{\text{ribonucleo reductases}} \approx \frac{10^7 \text{ dNTPs}}{1 \text{ cell}} \times \frac{1 \text{ sec}}{10 \text{ dNTPs}} \times \frac{1 \text{ cell}}{6000 \text{ sec}} \approx 150 \text{ ribonucleo reductases}$$

(B)

replication

$$N_{\text{replisomes}} \approx \frac{2 \text{ rep. fork}}{1 \text{ genome}} \times \frac{1 \text{ replisome}}{1 \text{ rep. fork}} \approx 2 \text{ replisomes / genome}$$
