

(A)

## translation-limited growth rate

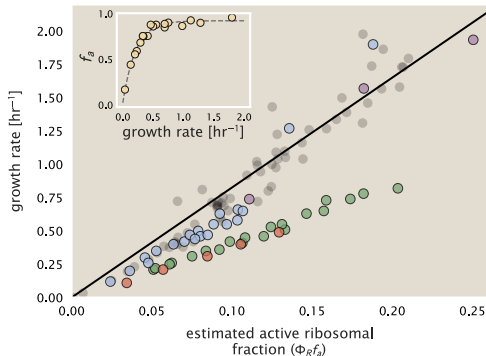

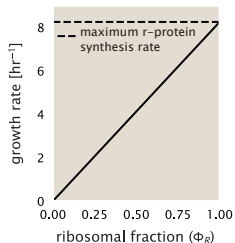

$$\lambda = \frac{R \times r_t \times f_a}{N_{\text{pep}}}$$

$$\approx \frac{r_t}{L_R} \times \Phi_R \times f_a$$

$$r_t = 17 \text{ aa/s}$$

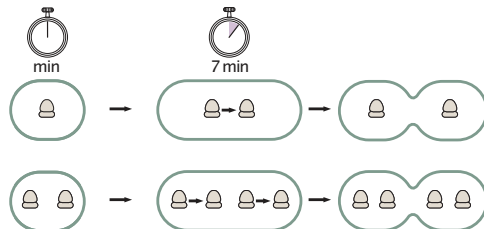

$$L_R = 7,459 \text{ aa}$$

$$f_a = 1$$

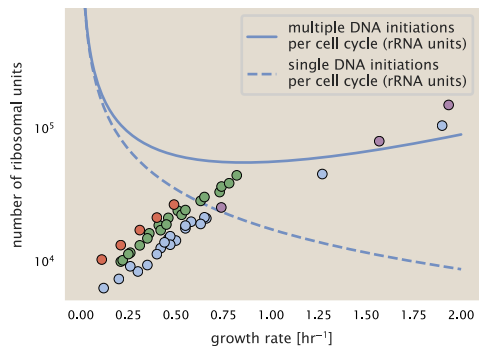

(B)

## maximum growth rate is set by ribosome synthesis

(C)

## limitations on rRNA synthesis
