

maximum growth rate is set by ribosomes

(B)

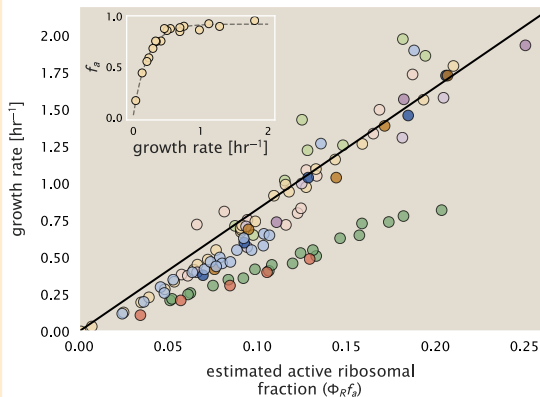

translation-limited growth rate

$$\lambda = \frac{R \times r_t \times f_a}{N_{\text{pep}}} \approx \frac{r_t}{L_R} \times \Phi_R \times f_a$$

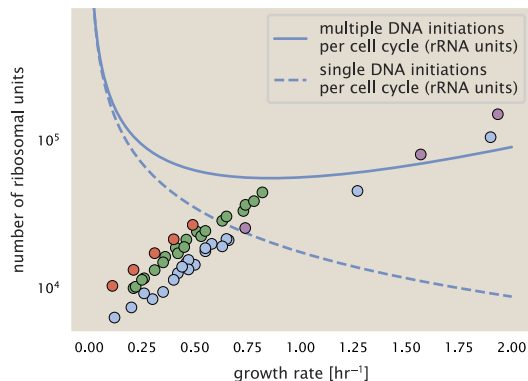

$r_t = 17 \text{ aa/s}$
 $L_R = 7,459 \text{ aa}$
 $f_a = 1$

(C)

(D)

limitations on rRNA synthesis
